

PT ELFRIDA PLASTIK INDUSTRI was established in 1976. For over thirty years, we have been expanding from a humble beginning to current position - a well reputed packaging company.

In 2008, we achieved an ISO standard in quality management and our plastic films are food contact grades which accomply with FDA (Food and Drugs Administration) requirements.

Producing quality packaging involves a detailed and complex process which requires cooperation and coordination from all of our qualified staff.

From discussing the inquiry, to the production planning and the production quality control.

We put great deal of effort to deliver higher than expected quality goods as we take our vision and mission very seriously.
